Risk Disclosure:
Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with investing, investments in small companies typically exhibit higher volatility. The Fund pursues a "value style" of investing. If the Adviser's assessment of market conditions, or a company's value or prospects for meeting or exceeding earnings expectations is inaccurate, the Fund could suffer losses or produce poor performance relative to other funds or market benchmarks. In addition, "value stocks" can continue to be undervalued by the market for long periods of time, and may never achieve the Adviser's expected valuation. There can be no assurances that the Fund will achieve its stated objectives. Diversification does not ensure a profit or guarantee against a loss. High short-term performance of the fund is unusual and investors should not expect such performance to be repeated.

The Russell 2500® Value Index measures the performance of those Russell 2500 companies with lower price-to-book ratios and lower forecasted growth values.
